These 2 reports that Camille Price sent us were not in a format that could be read but our SFRC had hard copies that they scanned and have placed them in the 30-day share folder on the I-Drive in my folder named "PSchmittdiel – Upper Animas." Feel free to access them.

FYI – I am setting up a "Share Point" portal – (I think it "operates" like an FTP portal) for us to share large documents with BLM or the State. I'm still learning about it and at the moment, I'm not sure that its set up to place sensitive documents on for certain parties viewing only – I think that will come later. But this might be a way to share large public documents with all the various federal, state and stakeholder entities involved with UA. I'll let you know when its set up and ready to start using.

Thanks.

Paula Schmittdiel

**Subject:** **Upper Animal Data Reports**

Steve,

The two *Analytical Results Reports* I referenced at our conference call yesterday that HMWMD completed for EPA under the PASI program (during Pat Smith's tenure) are entitled:

1) *Comprehensive Analytical Results Report, Upper Animas Watershed (CERCLIS # CO 0001411347), San Juan County, CO* dated March 1999, prepared by Camille Farrell, CDPHE-HMWMD; and

2) *Comprehensive Analytical Results Report, Cement Creek Watershed (CERCLIS # CO 0001411347), San Juan County, CO* dated April 1998, prepared by Camille Farrell, CDPHE-HMWMD.

The analyses included surface water, sediments, draining adits, waste rock piles, and some drinking water wells.

I do not have complete electronic versions of these reports, as they were prepared using programs that no longer exist. I have requested hard copies from HMWMD. Please let me know if are able to locate them in the EPA archives; if not, I can ask that a hard copy be made for your records as well. Conversely, if you have electronic copies of these reports, I would appreciate if you can send them to me.

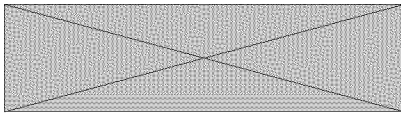

Please let me know either way.

Thank You,

**Camille Price**
